1. Applicant's arguments, see page 7, line 2 through page 9, line 14, filed July 2, 2004, with respect to claims 1-15 over the prior art of record have been fully considered and are persuasive. The rejection of claims 1-15 has been withdrawn.

2. Claims 17-30 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art of the record fail to teach or suggest singly and/or in combination an imaging system which provides for an aperture for receiving radiation from an object space, an interferometer arranged such that radiation received through the aperture is incident thereon, an array of detector elements for receiving output radiation from the Interferometer, a controller for scanning the interferometer through a range of different path lengths, for receiving signals from a plurality of elements of the array, for determining a spectral radiance value for each of a plurality of pixels, each pixel corresponding to one or more elements of the array, and for generating a grey scale image in accordance with the spectral radiance of each pixel, and a polarimeter for receiving said radiation from the object space, wherein the controller combines data received from said polarimeter with data received from the array of detector elements to obtain a score for each pixel, the score indicative of a level of interest for each pixel as prescribed for in the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
